

COLLINGHAM

KENSINGTON

SUSTAINABILITY POLICY

Collingham College recognises that its activities have the potential for both positive and negative impacts upon the environment at local, national and global levels. The College acknowledges its responsibility for environmental protection and also aims to contribute to the national commitment to sustainable development and to HMG and EU carbon reduction targets. The positive environmental sustainability aspects of teaching and learning will be promoted. The College will seek to achieve continual improvement in how it understands and responds to its environmental impacts.

The College commits itself to:

- 1 Communicate its environmental policy and strategy to staff, pupils and other stakeholders and to raise awareness amongst these groups of their own environmental responsibilities and requirement to commit to environmental improvements;
- 2 Comply fully with, and where possible, exceed standards set in relevant UK, EU and international regulatory requirements and agreements;
- 3 Reduce its carbon footprint through prudent use of fossil fuels (through energy conservation, management and efficiency within buildings) and to switch to low-carbon fuel alternatives where possible;
- 4 Manage and reduce water consumption;
- 5 Seek to reduce single-occupancy vehicle use to our sites; implement measures to encourage walking, cycling and the use of public transport as principal modes of commuting and business travel;
- 6 Reduce waste created and where possible to reuse and recycle before responsible disposal of surplus materials; to use recycled and recyclable materials wherever possible; all bins provided in the college are for recyclable paper and all other waste is brought to the non-recyclables bins in the back office
- 7 Integrate principles of environmental sustainability within all College policies and practices, specifically to those relating to procurement of goods and services;
- 8 Refurbish and develop the College in a manner that avoids negative environmental impacts and enhances the local environment;
- 9 Avoid or limit wherever practical the use of environmentally-damaging substances, materials and processes;
- 10 Work with local, regional and national partners to realise environmental projects;

- 11 Progress on implementing all areas of the policy and the Environmental Sustainability Strategy will be reviewed annually. The policy itself is subject to annual review.
